

Covered in this lecture:

The use of front-end frameworks

- ▶ Front-end frameworks are template websites that are set up in the most convenient way possible
- ▶ It's easy to modify these templates and it saves time
- Front-end frameworks might provide UI packs (UI = User Interface)
- UI packs include pre-made button designs, forms, fonts, headers, everything you see on the site
- ▶ Front-end frameworks usually provide 3 things:
 - Layouts
 - UI kits (graphic design bits)
 - Interaction snippets

See you next lecture!
